OVEN
300°C / 572°F

MICROWAVE

FREEZER
-20°C / -4°F

DISHWASHER

PORDAMSA's porcelain ware is suitable for **ovens, microwave ovens, freezer and dishwasher.**

We recommend **avoiding extreme temperature changes**. For example, do not place a dish directly into the hot oven if it has previously been in the freezer

CLEANING

- Porcelain is **resistant to scratches**, but to avoid possible damage, rinse the tiles with liquid detergent and a soft sponge without scrubbing hard.
- In the dishwasher, select a low temperature program and do not exceed the recommended amount of detergent.
- Load the dishwasher carefully so that the parts do not touch each other. Avoid the risk of direct contact with metal objects (metal racks, pots, plates, pans, tools, utensils, etc.).
- Use common liquid detergent and never abrasive cleaners. For hand washing, we recommend that you use a soft sponge or a damp cloth.

MAT

In the case of items with a matte finish, some stains may remain after washing. To remove it, it is recommended to clean with a grease remover. For difficult stains, leave the anti-grease for a few minutes and then clean the piece.

In general, they are not very visible and contribute to the normal and attractive appearance of handmade porcelain. Our quality controls define the acceptable regularities in the final product.
